With the explosion of smartphones in the workplace, employees have recognized and demanded support for a growing list of new ways to leverage this technology for their work. Faced with the realities of dealing with an increasingly mobile workplace, organizations struggle to find the balance between empowering mobile employees so they can be more productive, and protecting their sensitive information. Ideally, they would like to accomplish both without incurring the expense and time of deploying multiple new applications.

**Trend Micro™ Mobile Security** is an essential component of Trend Micro complete user protection solution that gives you full visibility and control of mobile devices, apps, and data through a single built-in console. It strikes the right balance between user productivity and IT risks.

**Mobile Security includes:**

1. Mobile Device Management (MDM)
2. Mobile Application Management
3. Mobile Application Reputation Services
4. Device Antivirus (Android)

A key part of an overall complete user protection strategy, Trend Micro Mobile Security greatly reduces complexity and costs compared to standalone mobile security and MDM solutions that require new management infrastructures.

Unlike other solutions, Trend Micro Mobile Security integrates layers of data protection to secure your corporate data—no matter where it goes. Encryption enforcement, remote lock and wipe, password enforcement, and other tools work together with device security and app management to keep your data safe.

**ADVANTAGES**

**Lowers Cost and Complexity**

- Streamlines management of mobile security, MDM, app management, and data protection in a single solution
- Simplifies deployment by leveraging the Trend Micro Cloud Communication Server, an optional cloud-based service that automates communications and reduces complexity of deployment
- Lowers operational costs with centralized visibility and control of all endpoint security
- Increases productivity and flexibility with broad platform support

**Improves Visibility and Control**

- Enables IT to track, monitor, and manage mobile devices, apps, and data through a single console
- Provides data on the number, types, and configuration of devices accessing corporate resources, whether they have enrolled or not
- Enables centralized policy creation and enforcement across single or multiple servers
- Supports a complete user protection strategy by integrating with the Trend Micro Control Manager console to centralize policy and management across other Trend Micro solutions such as OfficeScan™ endpoint protection

**Balances Risk with Enablement**

- Provides leading antivirus protection and ensures optimal device configurations to reduce malware risk
- Protects corporate data with remote lock and wipe, and selective wipe
- Shields private data from unauthorized access and improper use with password and policy enforcement
- Allows IT to block the use of risky mobile apps based on up-to-the-minute data from the cloud-based Trend Micro Mobile Application Reputation Service
**KEY FEATURES**

**Centralized Management**
- Streamlines administration with Trend Micro Control Manager, providing central threat and DLP policy management across layers of the IT infrastructure.
- Provides a single view of enterprise users from desktop to mobile device with views of threats over time—helping to identify advanced threats that may target users with multiple vectors.
- Achieves more consistent policy enforcement with single-click deployment of data protection policies across endpoint, messaging, and gateway solutions.
- Streamlines device enrollment with a choice of web link, QR code, or iTunes download.
- Offers instant summary views of compliance, inventory, protection, and health of all devices, whether enrolled or not.
- Provides visibility into the number, types, and configuration of devices accessing corporate resources.

**Mobile Application Management**
- Prevents the use of unauthorized, risky applications on network-connected devices with application blacklisting and whitelisting.
- Provides inventory management and reporting for better visibility of apps used across devices, groups, and the company.
- Enables IT to manage and even block specific types of apps based on categories with new Category App Management.
- Pushes applications to end-user devices using the Corporate App Store functionality to accelerate the use of optional and/or required business apps—with volume purchase plans integrated into the app store.
- Identifies and blocks apps that pose a security or privacy risk by correlating installed app data against the Trend Micro Mobile Application Reputation Service.
- Enables tracking, management, and deployment of Volume Purchase Programs on iOS devices.

**Mobile Device Security**
- Leverages Trend Micro’s leading malware protection, powered by cloud-based threat intelligence from the Trend Micro Smart Protection Network.
- Detects and blocks malicious applications and data files.
- Blocks malicious web content and sites using Web Reputation Services.
- Detects attacks on the device via network applications, ports, and services, using the firewall and IDS.
- Monitors, blocks, and logs calls, SMS, and MMS sent to and from devices based on user policy.

**Data Protection**
- Protects corporate data with remote lock and wipe, selective wipe, or device locate in case of stolen or lost phone.
- Enforces data encryption, and compliance.
- Notifies IT of jail broken or unencrypted devices.
- Empowers IT to lock or permit mobile device features such as cameras, Bluetooth®, 3G/4G, and SD card readers.
- Gives IT a view of devices that are not enrolled but are still accessing the corporate network.
- Allows IT to deploy, manage, and configure Knox containers on Samsung Knox compatible devices.

**Mobile Device Management**
- Enables IT to remotely enroll, provision and de-provision devices with corporate network settings such as VPN, Exchange ActiveSync and Wi-Fi.
- Facilitates the deployment of Apple TV and AirPrint services for iOS users.
- Supports device locate and inventory management to secure and track company- and employee-owned devices, whether they have enrolled or not.
- Allows cross-device and group policies for consistent enforcement of security and management requirements.
- Enables IT to control authorized devices and deploy relevant policies via the International Mobile Equipment Identity or IMEI, Wi-Fi, and Mac address.
- Allows IT to restrict phone features such as account modification, roaming, AirDrop, cellular data control, lock screen, pairing, Find My Friends, and more.

**Complete User Protection**
- Trend Micro Mobile Security is part of Trend Micro Complete User Protection, a multi-layer solution that provides the broadest range of interconnected threat and data protection across endpoints, email and collaboration, web, and mobile devices.

**Key Benefits**
- Balances employee enablement with IT control.
- Reduces deployment, IT and operational costs by integrating MDM, mobile security, application management, and data protection in a single solution.
- Secures a wide range of devices with antimalware, firewall and intrusion detection system (IDS) powered by Trend Micro’s global threat intelligence.
- Protects data wherever it goes with encryption, remote lock and wipe, and feature lock.
- Improves productivity by setting employees free to work anytime, anywhere from their choice of device.

**User Licensing**
- Trend Micro Mobile Security is licensed on a per user basis so a user can have multiple devices that only count as one license. Other mobile device management vendors license on a per device basis, which burdens IT with inventory management and forecasting employee device acquisition.
## Component Requirements

### Mobile Security Management Server

**Hardware**
- 1 GHz Intel® Pentium® processor or equivalent
- At least 1 GB of RAM
- At least 400 MB of available disk space
- A monitor that supports 800x600 resolution at 256 colors or higher

**Platform**
- Microsoft Windows 2003 Server Family
- Microsoft Windows 2003 R2 Server Family
- Microsoft Windows 2008 Server Family
- Microsoft Windows 2008 R2 Server Family
- Microsoft Windows 2012 Server Family
- Microsoft Windows 2012 R2 Server Family

**Recommended Platform**
- Windows Server 2003 R2 Enterprise Edition
- Windows Server 2008 R2 Enterprise Edition
- Windows Server 2012 R2 Enterprise Edition
- Windows Server 2012 R2 Standard Edition
- Windows Server 2012 R2 Web Server Edition

### Mobile Security Communication Server

**Hardware**
- 1 GHz Intel® Pentium® processor or equivalent
- At least 1 GB of RAM
- At least 40 MB of available disk space
- A monitor that supports 800x600 resolution at 256 colors or higher

**Platform**
- Microsoft Windows 2003 Server Family
- Microsoft Windows 2003 R2 Server Family
- Microsoft Windows 2008 Server Family
- Microsoft Windows 2008 R2 Server Family
- Microsoft Windows 2012 Server Family
- Microsoft Windows 2012 R2 Server Family

**Recommended Platform**
- Windows Server 2008 R2 Enterprise Edition
- Windows Server 2008 R2 Enterprise Edition SP1
- Windows Server 2008 R2 Standard Edition
- Windows Server 2008 R2 Web Server Edition SP1
For our customers, mobile device management is a major requirement within many bigger opportunities. Trend Micro Mobile Security enables a device security service that is flexible and stable—this is core to our philosophy. Plus, it makes it easy.
