

Trend Micro™ Worry-Free™ Business Security Hosted Quick Start Card

What is Worry-Free Business Security Hosted?

Worry-Free Business Security Hosted (WFBS-H) protects PCs from viruses, spyware, and other Web threats. Designed for small businesses without servers, it is easy to set up. It requires zero administration and fewer resources to defend your small business and its reputation against data theft and risky Web sites. Worry-Free Business Security Hosted is safer, smarter, and simpler security.

Other WFBS-H features:

- Provides multi-desktop protection with updates and upgrades maintained by Trend Micro, not you
- Sets up easily - there is no server component to install
- Save time with central management of desktop security
- Manages PC security from anywhere, anytime with only a Web browser and an Internet connection to access a central console

Can I try Worry-Free Business Security Hosted for a while?

Yes, you can try the service for a period of 30 days before buying it. After buying the service, you can migrate all these settings to your full service.

- 1 Visit <https://wfbs-h.trendmicro.com/WFBSH/LandingPage/TrialUser.aspx>.
- 2 Select your region and language. Click **OK**.
- 3 Complete the Trial Registration form and click **Submit Application**. This also takes care of setting your user name and password. Trial account user names begin with a '#'.

Note: Full account user names do not begin with a '#'.

The screenshot shows the WFBS-H logon screen. The title bar reads 'TREND MICRO | Worry-Free™ Business Security Hosted'. Below the title bar is a 'LOGON' section with the instruction: 'Please type your username and password to access the product console'. There are two input fields: 'User name:' with the value 'max_korn' and 'Password:' with a masked password '*****'. A 'Log on' button is located to the right of the password field.

Where can I buy Worry-Free Business Security Hosted?

Contact your Trend Micro reseller for purchase options. If you live in North America, you can also buy WFBS-H from <http://smbstore.trendmicro.com/>. Depending on your region, your reseller will give you either a Registration Key or an Activation Code. Use this to register WFBS-H on the Trend Micro Online Registration (OLR) site.

How can I activate Worry-Free Business Security Hosted?

When you buy WFBS-H, you will receive either a Registration Key or an Activation Code.

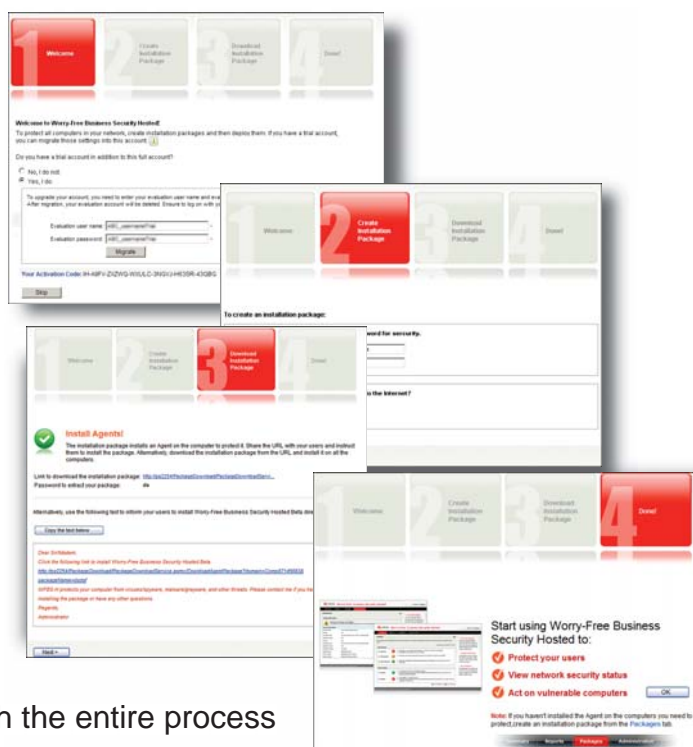

- 1 Visit <http://olr.trendmicro.com>. If you have an existing OLR account, sign in with those credentials. If not, please create one.
- 2 Follow the onscreen instructions to register WFBS-H. This includes setting up your WFBS-H user name.
- 3 Use the URL and login credentials that we will send you by email to access the WFBS-H console.

How do I get started?

Visit <https://wfbs-h.trendmicro.com/>, select your region and language and log in

Now you can:

- Migrate your trial service account to the full account (this option is available only to full service users). To migrate, on the Welcome screen, click **Yes, I do**. Type your trial credentials and then click Migrate.
- Use the wizard to create installation packages. This wizard guides you through the entire process to create, download, and deploy installation packages to clients.
